Contract Manufacturing of Sterile Injectables and Non-sterile products

Jubilant HollisterStier is an integrated contract manufacturer of sterile injectables, ophthalmics, otics and sterile and non-sterile topicals and liquids. Our facilities in North America provide specialized manufacturing for the pharmaceutical and biopharmaceutical industries. We provide a full-range of support and services to streamline the manufacturing process such as on-site assistance from process qualifications through product release. We offer turn-key services including full testing, regulatory support, supply chain support, secondary packaging, cold chain management, stability, CMC support and serialization.
